## **MSSNY SURVEY ON QUALITY OF CARE OF NON-PHYSICIAN PROVIDERS DURING COVID-19 EMERGENCY**

The Medical Society of the State of New York (MSSNY) has asked us to share with our members the following survey regarding services rendered by non-physician providers (NPP) during the COVID-19 public health emergency. Please see below for more information and to participate in the survey.

### **MSSNY Survey on NPPs**

During the COVID-19 emergency, to address the potential deficit of available practitioners to treat patients coming into hospitals, various advanced care practitioners including nurse practitioners, physician assistants, and nurse anesthetists were given the authority by Executive Order to practice without physician supervision.

The goal of this survey is to assess physician experience of the quality of care delivered by these advanced care practitioners during the emergency.
