2013-2022

PRIMARY ALLEGATION

NOTES:

- “Primary allegation” is the main allegation by plaintiffs’ attorneys of what the psychiatrist did wrong
- “Incorrect treatment” will represent a high percentage of cases because plaintiffs’ attorneys often use a broad, general allegation initially; this category includes all types of cases, including suicide and psychopharmacology
- The category labeled “Improper Supervision” refers to supervision of patients as well as of other providers
